

# REUSABLE MEDICAL MASKS

*Made in Canada*

Our reusable (washable and sterilizable) masks are made of medical-grade fabric with hydrostatic pressure resistance, high liquid barrier performance, protection from fluid, bacterial & particle penetration, as well as droplets spread.

## Characteristics :

- Micro-fiber fabrics, which complies with EN13795 and AAMI PB-70 standards.
- High-density construction (resisting to liquid, bacterial and particle penetration).
- Non-linting yarns (reducing risk of fiber generated infection).
- Anti-static carbon fibers (enhancing safety in high oxygen environments).
- Long-term durability (reducing disposal costs)
- Allow sterilization while maintaining a long shelf life.
- Adjustable with nose-clip

## Options:

- RFID chips for traceability & quality control purposes.
- Customized Logo up to two colors.
- Various colours for of the mask.
- Available with elastics or ties.

## Handling:

- Normal washing & drying.
- Withstands more than 100 cycles.
